## PROJECTS

### ExamPortal:

- Designed and implemented a comprehensive exam portal project in Java, facilitating secure and efficient online examinations. This project encompassed user authentication, question management, automated grading, and result generation, contributing to a streamlined and user-friendly exam-taking process.

### CICO(check in check out)

- Developed a comprehensive student management system, CICO, to streamline various administrative tasks within educational institutions.
- Implemented robust security measures, including data encryption, user authentication, and access control, to safeguard student information and ensure compliance with data protection regulations.
- Designed and implemented RESTful APIs to enable smooth communication between the front-end and back-end services
